PROJECTS

Qr Code Generator

The QR Code Generator is a simple web-based tool that allows users to generate QR codes from text or URLs. By entering any text or a website link, the tool instantly creates a scannable QR code that can be used for quick access to the provided information.

Weather Web Application

The Weather Web Application is a user-friendly tool that provides real-time weather updates for any location worldwide. By entering a city name, users can instantly retrieve essential weather data such as temperature, humidity, wind speed, and weather conditions.
